

ECOLOGICAL SERVICES

SERVICES

- ◆ Wetland Delineation, Permitting and Mitigation
- ◆ Constructed Wetlands Design and Remediation
- ◆ Water Quality Monitoring, Including Chemical and Biological Activity
- ◆ Toxicity Studies
- ◆ Bioassessments
- ◆ Aquatic Risk Assessments
- ◆ Agricultural Pond Design and Engineering
- ◆ Lake and Watershed Resource Management
- ◆ Algae Control
- ◆ Wildlife Habitat / Aquatic Landscape Management and Restoration
- ◆ Storm Water Management and Engineering
- ◆ Hydraulic and Water Quality Modeling
- ◆ Wastewater Treatment Design
- ◆ Point Source Discharge Permitting and Engineering Services

Effective management of our water resources is not only measured by the presence or absence of chemical constituents, but also by the balance and health of natural ecosystems.

Draper Aden Associates has developed a complete water resource assessment and management team to evaluate complex water quality issues. We offer a variety of services that include resource management, riparian reclamation, technical and regulatory guidance, water quality monitoring and modeling, site characterizations, and corrective measures implementation. These services dovetail with our overall program of comprehensive environmental services, to further assist our clients in meeting their project needs.

Clients that have benefited from our Aquatic Services include local, state and federal governments; manufacturing companies; mining companies; land developers; landscape architects; resorts and golf courses; privately and publicly owned lakes and ponds; colleges and universities; utility service providers; agricultural industries; solid waste companies; and railroad companies.
