

# SOLID WASTE MANAGEMENT

## SERVICES

- ◆ Regulatory Interface
- ◆ Economic/Feasibility Analysis of Waste Management Alternatives
- ◆ Wastestream Analysis/Characterization
- ◆ Facility Siting/Public Involvement
- ◆ Recycling Analysis/Implementation
- ◆ Materials Recovery Facility Design
- ◆ Composting Analysis/Implementation
- ◆ Transfer Station Design/Permitting
- ◆ Baling Facility Design/Permitting
- ◆ Hydrogeologic Assessments
- ◆ Groundwater Monitoring
- ◆ Landfill Design/Permitting
- ◆ Landfill Closure Planning/Design
- ◆ Construction Management
- ◆ Comprehensive Soils Testing Laboratory
- ◆ Construction Quality Assurance (CQA) and Certification
- ◆ Facility Operation Management
- ◆ Design/Build, Design/Build/Operate Solutions

## SUPPORT SERVICES

- ◆ Ecological Services
- ◆ Environmental Services
- ◆ Geographic Information Systems
- ◆ Geological/Hydrogeological Services
- ◆ Geotechnical Engineering
- ◆ Site Planning and Engineering
- ◆ Structural Engineering
- ◆ Subsurface Utility Engineering
- ◆ Surveying
- ◆ Telecommunications Engineering
- ◆ Transportation Engineering
- ◆ Utilities/Civil Engineering

Draper Aden Associates is a solid waste management specialist, *and* a multi-disciplined company with in-house expertise and resources in companion fields. We are able to tackle virtually any project for our clients, eliminating the need to outsource critical engineering or environmental expertise.

Few firms, regardless of size, rival the solid waste management credentials offered by Draper Aden Associates. Our staff boasts nearly 500 years of collective solid waste management/environmental experience throughout the South and Mid-Atlantic regions, as well as a track record of over 450 successful solid waste management projects. We offer significant expertise and experience applied with the personal attention of the company's ownership.

Our experience includes, but is not limited to, Subtitle D landfills, transfer stations, baling facilities, materials recovery facilities, convenience centers, landfill gas recovery systems, and composting systems. We have also operated many of these facilities, and provided operational expertise to many of our clients. Thus, our solid waste planning efforts retain the credibility of being produced by individuals that not only know the technologies involved, but that have experience developing and operating facilities using state-of-the-art technology.
