- ◆ Telecommunications Engineering
- ◆ Transportation Engineering
- ◆ Utilities/Civil Engineering

Since 1972, Draper Aden Associates has enjoyed an outstanding reputation and recognition as one of the preeminent surveying and engineering firms. We employ surveyors, engineers and technicians to handle all your surveying and land use issues. Our OSHA/Hazardous waste certified surveyors respond efficiently to assure your project's success. Commercial, industrial, residential and institutional development, highway construction, landfill development and property transfer surveys are all completed with an awareness of how our surveys impact the success of your project.

Draper Aden Associates offers 13 fully-staffed survey crews serving our Virginia offices. The firm's trained surveying personnel use the most modern traditional survey techniques in conjunction with satellite Global Positioning Systems (GPS) and we are fully automated with robotic total stations and data collectors in the field for quick and easy transfer of data to computers and data plotters. These devices interface with site personnel and office technicians so information is gathered and downloaded quickly and cost-effectively.
