2010 VA General Assembly **Stormwater Management Legislation Under Consideration**

Our website has posted, for your convenience, a list of newly introduced bills in this year's General Assembly that look at stormwater management issues. This list includes a brief summary in a condensed format for easy reference.

The idea is to give viewers an easy reference to legislation that may impact their professional decision-making process. The list is representative of legislation and in no way is all inclusive. The status of the bills will be updated on a weekly basis.

To access our list of legislative bills that concern stormwater management go to <http://www.daa.com/portfolio/siteplan.htm>.

Detailed information about the bills and real-time updates can be found on the Virginia General Assembly Information System website at <http://leg1.state.va.us/>.
