2010 VA General Assembly **Legislation That Affects You**

Our website has posted, for your convenience, a list of newly introduced bills in this year's General Assembly. One list summarizes legislation dealing with water and wastewater concerns and one list deals with solid waste issues. These lists include brief summaries in a condensed format for easy reference.

The idea is to provide viewers with a summarization and easy access to legislation that may impact their professional decision-making process. The list is representative of legislation and is, in no way, all inclusive. The status of the bills will be updated on a weekly basis.

To access our list about water and wastewater legislation go to <http://www.daa.com/portfolio/civil-utilities.htm>.

To access our list about solid waste legislation go to <http://www.daa.com/portfolio/waste-resource-engineering.html>.

Detailed information about the bills and real-time updates can be found on the Virginia General Assembly Information System website at <http://leg1.state.va.us/>.
